DILATION REFUSAL WAIVER

Patient Name:

DILATION

We Prefer To Dilate: When indicated, pupillary dilation improves our doctor's ability to examine the internal structures of the eye for signs of disease, which is important for your health and well-being. Normal side-effects usually last 3 to 5 hours, and they include sensitivity to bright light (for which disposable eye shades are provided upon request) and difficulty focusing on near objects. Normally, your distance vision is not affected very much, and it is possible to drive safely after dilation if you currently have fairly up-to-date prescription eyeglasses.

Patients May Refuse: Patients reserve the right to refuse any test or diagnostic procedure recommended. If a patient refuses, however, he or she assumes all of the risk for potentially not detecting, and thereby treating in a timely manner, any serious eye conditions.

Patients May Reschedule: Some patients prefer to reschedule their dilated retinal exam for a different day and time to minimize visual side-effects upon their return to work or school. We will be happy to schedule a second appointment at a later time for this purpose, **privately charging an additional fee of \$40.00.** There is absolutely **NO ADDITIONAL CHARGE** if we complete the dilated retinal exam during your initially scheduled comprehensive eye examination.

(To Be Signed ONLY If You Are Refusing Dilation)

I, under my own will and judgment, refuse to have my eyes dilated. As a consequence, I understand that the doctor may not be able to detect cases in which the retina is diseased, physically compromised, or harboring cancerous growths. As such, early detection and diagnosis of certain eye conditions, along with timely and effective treatment, may not be possible. I accept all risk for the possibility of not detecting these eye conditions without pupillary dilation, and I understand that these conditions may result in permanent blindness, or even death.
